Introduction

Galileo Internationally

Galileo was founded in 1971 by United Airlines (based in Chicago) who introduced the Apollo® computer reservation system (CRS), for use in their own offices to automate seat reservation, booking and tracking. Five years later, United created the Apollo Travel Services (ATS) division, and the Apollo CRS was marketed to travel agencies in North America and Japan.

In 1986 Apollo Travel Services, was renamed Covia, and became an independent affiliate of United Airlines. In response to the growing need for CRS automation in Europe, The Galileo Company Ltd was incorporated by shareholders of British Airways, Swissair, KLM Royal Dutch Airlines, Alitalia and Covia. In the U.S., United Airlines sold 50 percent of Covia to USAir, British Airways, Swissair, KLM Royal Dutch Airlines and Alitalia, creating the Covia Partnership. Three years later, Air Canada, Austrian Airlines, Aer Lingus, TAP Air Portugal, Sabena and Olympic Airways became Covia's final eleven airline owners.

In 1997, Galileo became a publicly traded company, listed on the New York and Chicago Stock Exchanges. Four years later, in October 2001, Galileo was acquired by Cendant Corporation, forming the cornerstone of Cendant Travel Distribution Services Group, Inc. (which changed its name to Travelport Inc. in April 2006). On August 23, 2006, Cendant Corporation sold Travelport Inc. to an affiliate of The Blackstone Group.

Galileo, one of the world's leading providers of electronic global distribution services, connects to 450 airlines, 52 low cost carriers, 23 car rental companies, 70,000 hotels.

ITQ LANKA (PVT) Limited
Suite#4-09 Majestic City,

Galileo officially distributed in Sri Lanka by

Course Objectives

At the end of the course you will be able to

- Quote a fare for a booked and proposed itinerary.
- Build manual fares for single and multiple passengers.
- Print tickets and update ticket modifiers and print recovery.
- Display printer linkage and define status.
- Understand TINS table and functions.

GALILEO 360° FARES

Galileo 360° Fares introduce state of the art capabilities for pricing airfares.

The Galileo 360° fares system is one of the most competitive products in the travel industry, encompassing more features of the Airline Tariff Publishing Company (ATPCO) Automated rule ,Routing and Footnote products than systems used by many of the other global distribution systems.(GDS).

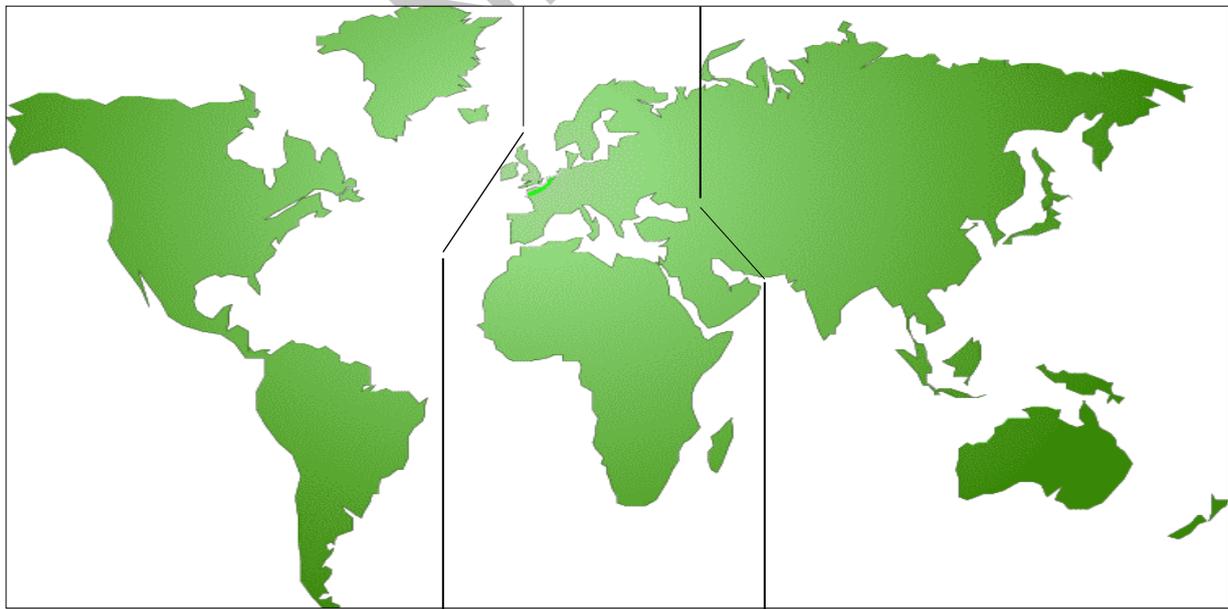

Galileo 360° fares represent the migration of the North American Fare Quote system and International Fare Quote system to a fully automated product.

Galileo 360° fares has one database ,North American Fare Display (NAFD) for fares within North America(USA,Canada,Puerto Rico and the US Virgin Islands),and a second database, International Fare Display (IFD) for international fares (the rest of the world).Each database is frequently updated with carrier filing changes, and information is electronically transmitted to Galileo.

- G** - Guaranteed preferred content from airline partners
- A** - ATPCO fare rules fully validated
- L** - Leading the industry in automated Fares & Rules uploading
- I** - Improved processing of surcharges, enhanced rules text and automated routing information.
- L** - Latest information available from a comprehensive database of millions of fares
- E** - Ensures fares quoted exactly as filed by carriers.
- O** - On going commitment to setting higher Industry standards
- 3** - 3 parts - Airline Public Fares, Agency Private Fares, Airline Private Fares
- 6** - 6 Fare sources
- 0** - 0 Manual intervention in Fares uploading
- F** - Fully automated solution
- A** - Ability to work out most complex routings with ease & accuracy
- R** - Records all the rule data updated by the airlines
- E** - Enhancements like passenger type age modifiers, Passenger Type Code (PTC) lookups, more concise route displays to name a few.
- S** - Sum up – GALILEO 360o FARES LEADS THE WAY.

Fares are divided into 3 main sections

- **Fare Display**
- **Fare Quote**
- **Focalpoint Shopping**

Explanation

The following table lists the components of the fare display.

Component	Description
FDCMBDXB1APR	Fare Display format.
FARES LAST UPDATED 29MAR 9:35 AM	Date and time of most recent fares update.
DEPART 01APR	Departure Date
MPM 2451 EH	Maximum permitted mileage and global indicator
PUBLIC/PRIVATE FARES FOR 79G2	Public and private fares for PCC 79G2
USD THB INR CURRENCY FARES EXIST	Alert that USD / THB fares exist for this city pair
CX	Carrier
FARE LKR	Fare and currency code
FARE BASIS	Fare basis code
C	Booking class code (RBD)
AP	Advance purchase requirement
MIN/MAX	Minimum and maximum stay requirements
SEASONS....	Seasonal restrictions
MR	Mileage/ Routing indicator
GI	Global indicator
DT	Day/ Time flight restrictions

Fare Display Search Qualifiers

H/FD

A more appropriate fare display may be obtained by using search qualifiers. Search qualifiers may be input in any order, and may be used in two ways:

- As part of the initial fare display input
- To update an existing display
- Carrier Qualifier

Format	Description
FDCMBNYC1APR/BA	Carrier specified Fare Display
FD/CX/BA/SQ	Specified carriers may be added to an existing fare display
FDCMBNYC1APR/BA-OW	Journey Specified Fare display (One Way)
FDCMBNYC1APR/BA-RT*SEA	Fare Display with Passenger Type Code (H/PTC)
FDCMBSIN1APR/SQ*CNN or C08	Fare Display with Passenger Type Code for accompanied child
FDCMBSIN10APR/SQ@V14DLK3	Fare Display with the specific Fare Basis
FDCMBSIN1APR/SQ-RT*ADT*CNN@V14DLK3	Combining search qualifiers
FDCMBMEL10APR/MH-K	Fares with booking class K (carrier required)
FDCMBMEL10APR/MH-PRI-ADC00	Fares with private Account code (ADC00)
FDCMBMEL20JAN16.T10JAN16/EK-I	Historical fare Display with the Ticketed date & the specific RBD
FDCMBYUL10APR/UL.PA	Fare Display with Specific Global indicator (PA)
FDCMBSGN10APR/SQ:P	Fare Display for Private fares only

These search qualifiers can be used at the end of the above FD entries or as a follow up entry.

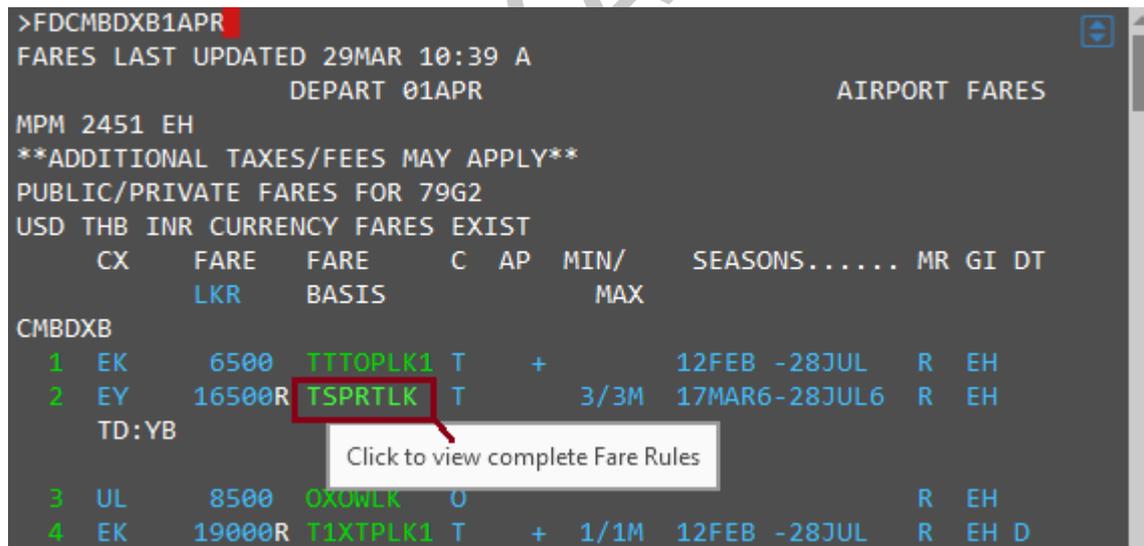

FD/EK	Update active Fare display for a particular carrier, upto 3 carriers
FD/2	Update active Fare display to show the ½ RT NUCs
FD/X	Updates active Fare display to High to Low order
FD-OW	Update active Fare display to show only the specified type of journey fares
FD@SPCLS	Update active Fare display to show the Special fares
FD*PTC	Update active Fare display to show fares filed for all passenger types other than Adults
FD/BA-B	Update active Fare display for the specified booking class (Carrier has to be specified)
FD:NUC	Update active Fare display to show the fares in NUCs
FD:USD	Update active Fare display to convert fares into an alternate currency using BSR
FD::USD	Update active Fare display to show fares filed in an alternate currency
FD:LOC	Convert the NUC or Alternate currency display back into Local currency
FD.T1MAR07	Update active Fare display to show fares that meet with the Ticketing date mentioned
FDDLHR	Update active Fare display to show fares with a new destination as London
FDOBOM	Update active Fare display to show fares with a new Origin as Mumbai

FD*	Return to fare display screen
FH*5	Display Fare Display history for line number 5
FM*8	Display the maximum permitted mileage and mileage surcharge info for the line 8

EXERCISE - Fare Display

1) What is the entry to display a fare from DXB to FRA on LH?

2) Write the follow up entry to check the return fare.

3) Please mention if the fare is Mileage based or Routing based.

4) If it is a routing based fare, mention any one permitted routing.

5) How would you check a return fare display from BOM to SIN on SQ for a child in business class?

6) What is the entry to see a round the world fare on AC?

7) How would you check a code for an infant with a seat (please mention the code)?

8) How would you redisplay the fare list?

9) What is the entry to display the USD fare for a domestic sector BOM DEL on S2?

10) What is the entry to access the paragraph for stopover rules for the fare on line 4?

11) Display all fare notes/rules for fare on line 4.

12) Change the boarding point/origin to MAA.

Focalpoint Shopping

Focalpoint shopping merges manual comparison of tariff data and seat availability in a single request. It allows you to search for low fares and available flights and make reservations in three easy steps. You can use Focalpoint Shopping with or without a booking file and search for available public, private and net fares in the Galileo 360 fares database.

Specify origin, destination and dates of travel in order to search for low fares, and focalpoint shopping will return many flight and price combinations. You can use both pricing modifiers and availability modifiers to customize your request.

As per the system logic the FS entry only looks at Galileo (general) availability and does not go to the carrier specific availability. At the time of using FS entry, if the Galileo general availability shows the cheaper class as closed, system will not quote fare even if the class is available in carrier specific availability.

Note

- It will look for direct flights. Or
- It will look for online connections or
- It will look for same day connection.

Focalpoint Shopping without a Booked Itinerary

H/FS

Focalpoint Shopping can be used when there is no booked itinerary. You must specify the travel details after the FS function identifier. The basic entry starts with routing and dates but there are many optional entries that may be added to tailor the shopping request to your customers' requirements.

Basic Entry: FSCMB10MAYBHX30JUNCMB

Note: This entry is only valid if there is no itinerary present. You can add many options to the basic entry.

Fare Quote calculates

- The price for a booked itinerary
- The appropriate fare taking into account all fare rules & fare construction principles
- Maximum 16 segments
- Maximum 8 Fare Components
- Maximum 99 passengers in a single entry
- Maximum 6 PTCs per entry
- A stopover where connections are 24 hours or more for International Fare Quote & 4 hours or more for North American Fare Quote

FQ/CUL	Quote lowest possible fare for the booked itinerary(with the plating carrier)
FQA	Quote Alternate fares for the booked itinerary
FQBB	Quote Best Buy fare available(disregarding the booked class)
FQBC	Best buy comparison(best buy vs booked itinerary)
FQCAI	Quote fare with Plating Carrier specified
FQBA	Best buy regardless offer the lowest applicable fare for the itinerary regardless of seat availability. The fare is not filed in the booking file.

Fare Quote Qualifiers

FQ	Quote all segments, all passengers as either Adults or Infants (as specified)
FQP1-2.3*C07.4	Quote Passengers 1 & 2 as Adults, 3 as a Child of 7 years, 4 as an Infant (Adults & Infants are identified by the system), all segments
FQS1-4.6	Quote Segments 1, 2, 3, 4 & 6, all passengers
FQ*C05/ACC	Quote for a child accompanied by an adult in a separate Booking File
FQ@BLXAP	Fare Quote all segments with Fare Basis BLXAP
FQS1-2.4	Quote for segment 1,2 and 4
FQP1/S1@Y	Fare quote passenger 1 for segment 1 with fare basis 1
FQX2	Quote fare considering segment 2 as a no-stopover.
FQO2	Quote fare considering segment 2 as a stop over.

Follow up Entries

*FF	Display a summary of all Filed Fares
FQL1	Display fare construction in ladder format (only fare quoted in current transaction)
*FF2	Display fare construction in linear format of the 2nd Filed Fare
FQN	Display fare components of the fare quote before ending
FN2	Display Fare Notes by paragraph header for fare component 2 before ending
FN2/P7-8.10	Display Fare Notes text of paragraphs 7, 8 &10 before ending
FN2/ALL	Display all Fare Notes text before ending

Cancel Filed Fares

FX1	Cancel Filed Fare 1
FX1.3	Cancel Filed Fares 1 & 3
FXALL	Cancel all Filed Fares

AUTOMATED PLATING CARRIER LOGIC (APCL)

Galileo has implemented Automated Plating Carrier Logic to assist the carrier selection at the time of fare quote, to ensure applicable YQ/ YR taxes and PFC charges (if applicable) are quoted for a booking file. Plating Carrier selection is a vital component of any fare quote request, and determines how the Galileo system applies carrier specific YQ/ YR taxes and North American Passenger Facility Charges (PFCs).

Benefits of APCL

- 1) Eliminates the need to input a Plating Carrier in FQ & FS entries
Accurate fare quotes to be returned to the user without the need for manually entering plating carrier details. This enhancement applies to all Fare Quote and Fares Shopping commands, including Fare Quote SuperBB™.
- 2) Automatically selects the Plating Carrier as filed in the fare rules
Booking File Validation Process & Reduction of Plating Carrier violation. A single ticket can be used to travel on the services of more than one airline; not all airlines, however, are in a position to accept tickets issued on behalf of another carrier. Interline Agreements are signed between carriers and determine which other airline tickets will be accepted for passenger travel. Failure to validate interline ticket acceptance between carriers can result in denied passenger carriage.
- 3) Greater accuracy in Fare pricing, thus reducing the chances of ADMs
Reduction of ADMs due to incorrect YQ / YR quotation.
The selection of carrier plating can be overridden at the time of fare quote, if so required, however it can result in ADMs or denied passenger carriage.

Fare Quote Best Buy

Fare Quote Best Buy by Cabin, has been introduced to enable a Best Buy request to return fares 'by cabin' or class, as specified by the requester. This is available for all itinerary types, International & North American.

This Best Buy process includes fares for the cabin specified and fares that are filed allowing free upgrade to a higher cabin & is available for all Best Buy transactions.

Galileo 360o Fares will

- 1) Process the best buy request per normal Best Buy processing, returning the best available fare for the cabin requested.
- 2) Only return a fare associated with the requested cabin, if fares for the requested cabin are not available, an error message will be returned, fares in a different cabin will not be returned.

Double plus signs (end item) followed by a hyphen (-) will be used to indicate that a cabin type is being requested, followed by the cabin identifier.

Changing Printer Changes

- HMOMECA050-U - Change status to UP
- HMOMECA050-ITN - Change device form to itinerary.

Stock Control

- HMTN/D - Display the current ticket stock
- HMTQ/D - Display the ticket quota for a specific travel agency

Ticketing Quota System

At the time of setting up an agency on automation, Galileo sets up a ticketing quota system which limits the number of airline tickets an agency may issue within a given quota period, both in total and on each carrier.

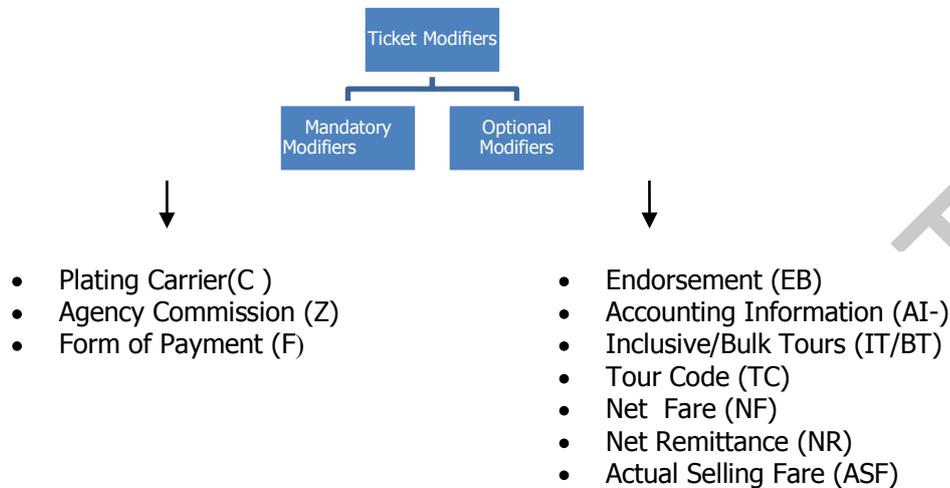

BSP determines

- The Quota period
- An agency's maximum quota.
- Which IATA agencies are included in the ticketing quota system

The IATA agency may only display their own agency ticketing quota, the NDC will build & maintain the tables.

Ticket Issuance

In all cases, before a ticket can be issued, certain elements called Ticket Modifiers must be present.

Forms of payment

FS	Cash
FCK	Cheque
FINV	Invoice (Must be followed by 1-38 characters of free text)
FNONREF	Non Ref (Must be followed by 1-38 characters of free text)
FMS	Miscellaneous (used when no FOP applicable)
FMR	Multiple Receivable(used when more than 1 FOP is applicable)
FEX6031234567894	Exchange/Reissue .
Credit Card	Galileo accepts most major Credit cards & has agreements with the companies to obtain automatic authorization at the time of ticketing. This authorization / approval code will get printed on the automated paper tickets. <i>GC*7/1 lists the accepted credit card companies.</i>

Optional Modifiers

Endorsement

- There are 2 lines of space on a electronic ticket for endorsements to print, each line has a maximum of 29 characters of space.
- The endorsements which get printed on the ticket are or 2 types.
 - 1) System Generated - These are filed by the airline along with the fare.
 - 2) Manually Added - These are added on by the agent after obtaining a system fare
- Any System generated endorsements will print first.
- If manual endorsements are added and cause the total number of characters to exceed 58, the text will appear truncated on the ticket.

EB VALID ON SQ ONLY

EB NT VALID ON CODESHAE FLIGHTS *EB NO DATE CHANGE PERMITTED

Tour Code

In order to identify the deal an agent has been given by an airline a tour code is required to print on the ticket.

- The deal will be settled directly by the airline with the agent concerned.
- Maximum 14 characters can be input
- The code will print in the Tour Code box on the paper ticket
- Symbols, spaces & '/' cannot be used

TC123456

TC56GBHU

Inclusive/Bulk Tour Code

- Many agencies now have special arrangements with airlines whereby they have negotiated discounted airfares that they can sell to their passengers; these generally fall into the categories of Bulk and Inclusive tour tickets.
- In order to sell these fares there are often rules that an agent needs to abide by such as selling the airfare in conjunction with accommodation.
- When it comes to issuing Bulk or Inclusive Tour tickets, the money paid by the customer often includes items other than just the flights (such as hotel or tour excursions as mentioned earlier) so there are strict IATA regulations as to the information that should be printed on the air tickets.
- European law states that for something to be sold and marketed as a package, the cost of the individual elements should not be identified to the client
- Because of these restrictions, the fare that is printed on the air ticket needs to be inhibited from printing
- IT will appear in the fare and total fare box regardless of the fare that was charged, taxes paid will print on the ticket
- BT signifies a "Bulk Tour" fare. .
- BT fares are usually given to agencies who book a high volume of seats, an example would be a consolidator or wholesaler.
- BT will appear in the fare and total fare box regardless of the Filed Fare.

IT - Inclusive Tour
BT - Bulk Tour Identifier

Net Remittance

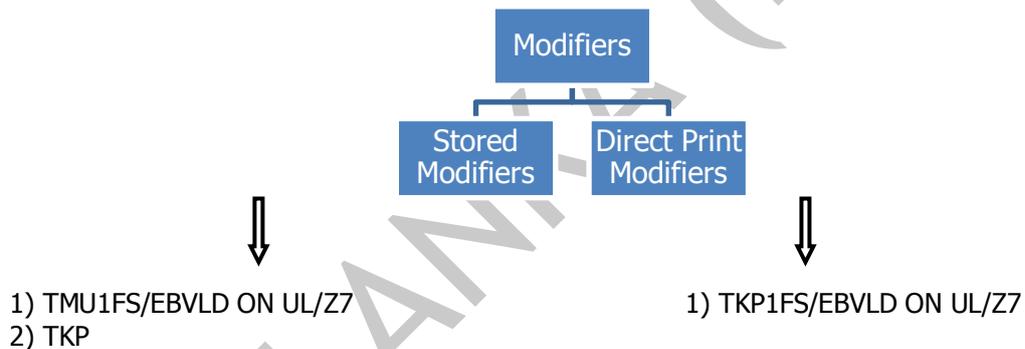

- It is mandatory to use the modifier every time a Nett Remit ticket is issued, to ensure accurate data is transmitted to the BSP
- The code to be input on the tickets will be advised by the respective airlines
- Supplementary commission will be settled via the BSP
- The deal code will appear in the Tour code box.
- If the FOT and the collecting fare differ.

Manual Fare Build

The Galileo system is capable of quoting most fares automatically. However, there are occasions when this is not possible or when you may elect to use a non-system fare such as a market fare. In these situations it is possible to enter the fare manually, in order that automatic ticketing can take place. The booking should be End Transacted before the Manual Fare Build screen can be obtained. Manual Fare Build can be used in 2 ways

- 1) Building Fares
- 2) Modifying a Fare Quote

Building Fares

This is used when a Fare cannot be automatically quoted. There are 2 basic steps in the process.

- Create the manual fare build - FBC
- Update/Amend the data - FBU
- File the manual fare - FBF

Commission	- 7%		
Endorsement	- Date change not permitted		

Re-Issue

EXCHANGE TICKETS

Sometimes a passenger's plans change after their ticket has been issued; this could be that their dates change, or they may wish to change their itinerary. Dependant on the rules of the fare that was booked originally, it may be permissible to reissue a ticket for a customer, and give them a new one in exchange for the original one. There are strict IATA rules governing this procedure. It is essential to refer to the fare notes or the issuing airlines to check the rules and regulations in order that you complete the ticket exchange correctly.

Ticket Exchange Vs Revalidation

The terms Exchange and Revalidation often get confused. If a passenger changes their dates of travel after ticket issuance but the fare, airline and routing stays the same as that on the original ticket, it is permissible to revalidate the ticket. If the change involves a change to the airline, routing or fare, you must go through the process of exchanging the ticket. In order to exchange a ticket it must have a flexible fare. If the original fare was not changeable and non refundable, the passenger would have no other choice other than to cancel the original itinerary, forfeit the fare and pay for the new itinerary again.

A Re-issue could be of 2 types

- 1) Re-issue of an Unused document**
- 2) Re-issue of a Partially used document**

Both of the above could result in one of the following 3:

- a) The same value as the exchanged ticket (An Equivalent Exchange)
- b) More than the value of the exchanged ticket (An Additional Collection -ADC)
- c) Less than the value of the exchanged ticket (A Refund due)

The procedure for carrying out a Re-issue will always be as follows:

- 1) Book the new itinerary
- 2) Fare Quote or Build the fare (FQ or FBC)
- 3) Convert the Filed Fare to a manual screen (*FB1 or * FB Filed Fare no.)
 - a. Delete the Paid taxes, retain new taxes (FBUTAX1/ +TAX2/ etc.)
 - b. Verify the Total (FBUTTL/)
 - c. File the Manual Fare screen (FBF or FBFALL)
 - d. End the transaction
- 4) Enter Ticket modifier FOP as EX
- 5) Re-issue the ticket with the help of the Fill in format screen

TMU1FEX0981234123123

TMU1	Ticket modifier update for filed fare 1
F	Form of payment identifier
EX	Exchange document
0981234123123	Electronic Ticket Number to be exchanged.

Notes:

- 1) For an e-ticket most of the fields will get automatically completed from the filed fare as well as from the original e-ticket.
- 2) As this is a Fill in Format screen, ensure that the INSERT key is switched off before entering the data.
- 3) Use the Tab key to move between fields & enter the relevant data.
- 4) Do not press ENTER until all fields are completed.
- 5) When there is a new tax to be collected, even if there is a Refund due on the Total fare, the system will still display the ADC screen.
- 6) When reissuing tickets where there is more than one passenger in the same filed fare, the FOP EX modifier should be added on at the time of ticket issuance. The tickets would have to be issued individually per passenger.

Upon successful completion of the Exchange screen, press ENTER. The resulting response could be one of the following 3:

1) The same value as the exchanged ticket (An Equivalent Exchange)

If it is an even exchange (i.e. NEW FARE is same as TTL VALUE and there is no additional collection) you will receive this response:

TICKET MODIFIERS UPDATED

2) More than the value of the exchanged ticket (An Additional Collection -ADC)

- A Multiple Receivable (MR) screen, with the value of the additional collection, will be Displayed.
- The additional amount is calculated automatically by the Galileo system comparing the NEW FARE and the TTL VALUE amount and dividing the same by the BSR entered.
- Up to three payment types can be specified to collect any additional amount
- If the whole amount is to be paid using one FOP, tab to the first Tab stop and enter the appropriate FOP code without the amount.

Note : If you need to redisplay the exchange screen at any time prior to completion, use the entry:

***EX**

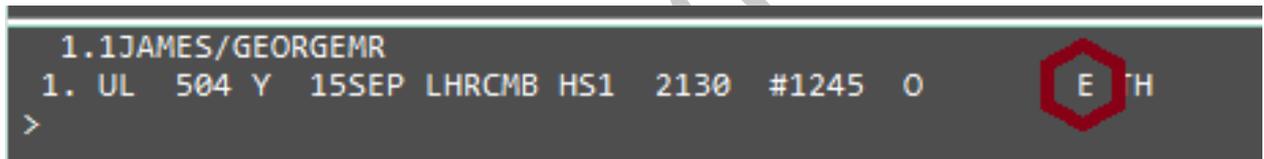

3. Less than the value of the exchanged ticket (A Refund due)

- If it is an exchange where a Refund is due (i.e. NEW FARE is less than TTL VALUE) you Will receive a REFUND fill in format screen

Electronic Ticket Update

Upon selling air segments some carriers who participate in electronic ticketing will repond with an "E" indicator on the right hand side of the screen. This indicator shows that only these segments will allow the option to issue E-Tickets.

Other carriers may not provide an indicator and in these cases you will need to rely ion information provided by the carrier as to which segments will be applicable for E-Ticketing.

Check Airline Eligibility (Interline Electronic Ticket Agreements.)

All of the segments to be ticketed must carry the "E" indicator if an electronic ticket is to be issued. There are also other restrictions on routes, number of segments and passenger types which are distinctive to each airline. You may need to check the airline's pages in GIS, e.g. GC*LH alternatively it may be advisable to check the airlines webpage. If the "E" indicator is not present please check "TTB1"for ET eligibility indicator.

If there is more than one carrier on the itinerary, you must also check to see if the ticketing carrier will allow electronic tickets on the other carrier(s). (Electronic Interline Agreement table)

DT/IAT/DISLH

Special Procedures for Electronic Ticketing

Name Field	Name Field Should contain the passenger's full first name. Name remarks do not reflect on an e-ticket image
Frequent Flyer	The Name field must match the name on the card
Credit Card Authorizations	Any credit card approval codes must be manually recorded in the booking if required, as no accountable travel documents are

	produced on paper on issuing an e-ticket.
Ticket Issuance	Please check that a vendor locator has been returned by the airline before e-ticket issuance
<i>Some airlines restrict or inhibit the production of e tickets for infants</i>	
Adding FOID information	The requirement of adding FOID information will differ from airline to airline, please check individual airline pages for the same H/FOID will provide the entries to be used

Display Electronic Ticket Records

All airlines allowing issue of electronic tickets provide access to their electronic ticket database. It is possible to display records for any electronic ticket which has been generated by your agency or another branch office.

From a retrieved booking file

*HTE	Display electronic ticketing data
*TE002	Display record 2 from the list of electronic tickets.
*TEL	Redisplay the electronic ticketing record list
*TEH	Display E-Ticket history

Outside a booking file

*TE/12596000078	Display electronic ticketing data by ticket number.(without the check digit)
*TE/AA/FF10087654	Display electronic ticket record of American Airlines by Mileage membership number
*TE/LH/CC1234567890123	Display electronic ticketing record held by Lufthansa by credit card number specified.
*TE/SQ/10JUL09CMBSIN-LEE	Display electronic ticketing record held by Singapore Airlines by date/board/off point/name record

Electronic Ticket Status Codes

The E-Ticket record as displayed on your Galileo screen contains mostly the same information as held by the carrier, this is due to the fact that the electronic ticket actually resides in the airline database and not within Galileo. Therefore, what you see on the screen is very similar to what the carrier can see, although the layout may differ slightly.

The status of each coupon of the electronic ticket is indicated in the USE column:

OPEN	Coupon is "live", still to be used and eligible for all status updates.
ARPT	Coupon secured by airline prior to scheduled departure.
CKIN	Passenger has checked in for the flight.
CLSD	Coupon status has been Closed for use by the carrier.
EXCH	Coupon has been exchanged.
FLWN	Coupon has been used for the associated flight.
IREG	Coupon control extended beyond normal 48 hour period for airport control.
LFTD	Passenger has boarded the aircraft.
REMV	Coupon data has been removed for the carrier's system after ticket has been fully used.
RFND	Coupon has been refunded to the passenger.
SUSP	Coupon has been suspended for use by the carrier.

USED	Travel has been completed for this coupon.
UNVL	Coupon is no longer available for use, it may only be exchanged.
VOID	Coupon has been voided.

Electronic Ticket Revalidation

When a passenger makes a change in his/her flight arrangements it is sometimes possible to alter the ticket he is holding rather than re-issue it completely, this is called revalidation.

- Ensure that the IATA rules and the fare rules have been followed.
- IATA states that travel agents may only revalidate a ticket to the same carrier, fare, class and routing.
- It is not possible to revalidate any past date segments or to revalidate a closed flight to an open segment.
- Revalidation of tickets is governed by strict IATA rulings

Steps to Revalidate an e-ticket

- 1) Amend the itinerary as appropriate, and end and retrieve the BF
- 2) Display the appropriate e-ticket record
- 3) Revalidate the coupon of the changed sector with the new booked segment
